## **1 The Higher School Certificate Program of Study**

The purpose of the Higher School Certificate program of study is to:

- provide a curriculum structure which encourages students to complete secondary education
- foster the intellectual, social and moral development of students, in particular developing their:
  - knowledge, skills, understanding and attitudes in the fields of study they choose
  - capacity to manage their own learning
  - desire to continue learning in formal or informal settings after school
  - capacity to work together with others
  - respect for the cultural diversity of Australian society
- provide a flexible structure within which students can prepare for:
  - further education and training
  - employment
  - full and active participation as citizens
- provide formal assessment and certification of students' achievements
- provide a context within which schools also have the opportunity to foster the students' physical and spiritual development.

## **2 Introduction to Italian Beginners in the Stage 6 Curriculum**

### **2.1 The Language**

The language to be studied and assessed is the modern standard version of Italian. This is the language as spoken in Italy. During their course of study, students may also encounter dialects and provincial variants. Students should be aware of different levels of language, for example, formal and informal. This includes the use of colloquialisms, where they are appropriate, and an awareness of regional differences.

### **2.2 Description of Target Group**

The Italian Beginners Stage 6 course is a two-year course, which has been designed for students who wish to begin their study of Italian at senior secondary level. It is intended to cater only for students with no prior knowledge or experience of the Italian language, either spoken or written, or whose experience is derived solely from, or is equivalent to, its study for 100 hours or less in Stage 4 or Stage 5.

For the purpose of determining eligibility, speakers of dialects and variants of a language are considered to be speakers of the standard language. (Refer to the relevant section of the Board of Studies *Assessment, Certification and Examination Manual*.)

Students in Stage 5 may not be accelerated into Languages Beginners courses.

All eligibility requirements for Languages must be addressed.

## 2.3 Rationale

Language is the basis of all communication and human interaction. By learning a second or subsequent language, students develop knowledge, understanding and skills for successful participation in the dynamic world of the 21st century.

Communicating in another language expands students' horizons as both national and global citizens.

Language and culture are interdependent. The study of another language develops in students the ability to move successfully across and within cultures, and, in the process, to experience, value and embrace the diversity of humanity.

Contemporary research has shown that learning a language facilitates cognitive and intellectual development beyond the language classroom. It enhances creativity and develops more refined and sophisticated skills in analysis, negotiation and problem-solving.

Literacy skills are enhanced through the study of another language. As the use of language is a process of communication, students' learning experiences offer opportunities to consolidate and extend their interpersonal skills. By engaging with various modes of communication, students develop effective skills in interacting, and understanding and producing texts.

Students who learn another language understand how languages work as systems. They become aware of the structure of that language through the analysis of patterns and can apply this knowledge to the learning of other languages. By making comparisons between and among languages, students strengthen their command of their first language.

Extensive migration from Italy during the last 150 years has resulted in Italian being spoken in many countries in Europe, in North and South America, Africa and Australia. The study of Italian is relevant to students in Australia because Italian is a strong community language. The history of Italian settlement in Australia can be traced to the First Fleet in 1788 and Italian-speaking communities in Australia continue to play a significant role in our culturally diverse society.

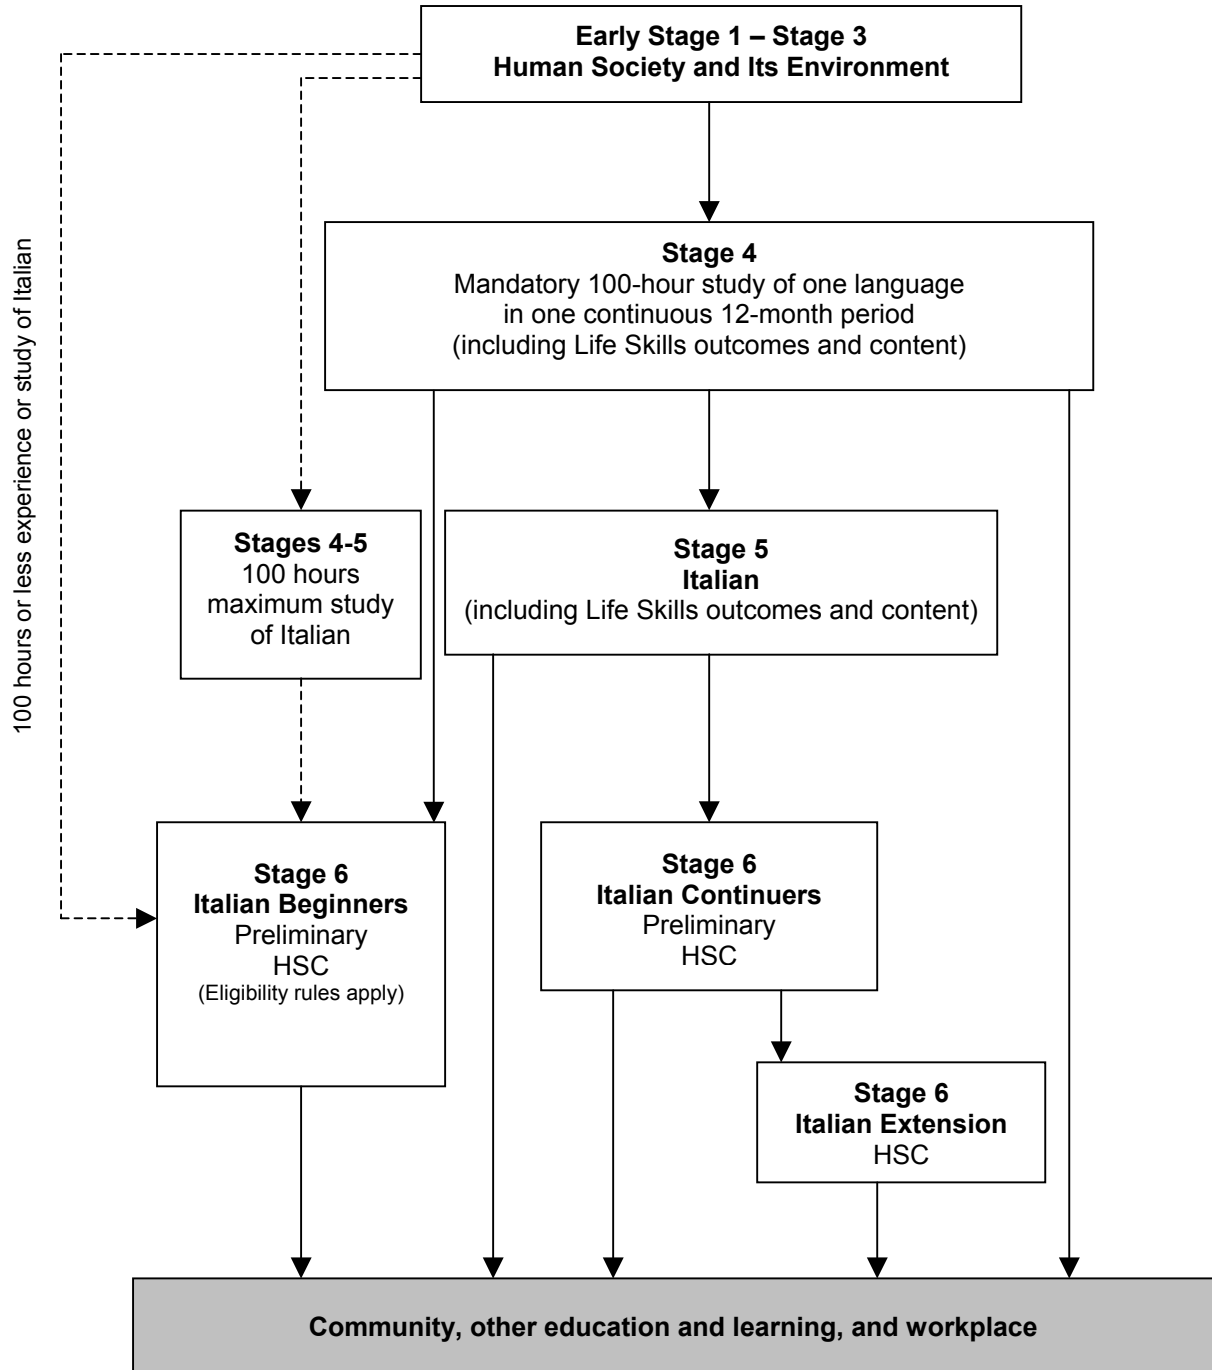

Italy is one of the most industrially and economically advanced nations in the world and ranks among Australia's top international trading partners in a mutually supportive trade relationship. Italy remains a strong buyer of Australian primary products, while Australia has been a consistent buyer of Italian technology and design. A significant number of Italian companies have branches in Australia.

Italians and the Italian language make a distinctive contribution to politics, art, architecture, cuisine, music, science, literature, film and theatre. The study of Italian enhances students' enjoyment and appreciation of these areas. Students have much to gain by acquiring knowledge of the language and cultural heritage of Italy.

The study of Italian provides students with opportunities for continued learning and for future employment and experience, both domestically and internationally, in areas such as public relations, commerce, hospitality, education, marketing, international relations, media and tourism.

### 3 Continuum of Learning

The diagram places the syllabus in the context of the K-12 Italian curriculum.

## **4 Aim**

The aim of the *Italian Beginners Stage 6 Syllabus* is to enable students to develop:

- skills in effective communication
- knowledge of the nature of language
- understanding of the interdependence of language and culture.

## 5 Objectives

### Communication

#### **Objective 1 – Interacting**

Students will develop the linguistic and intercultural knowledge, understanding and skills to communicate actively in Italian in interpersonal situations.

#### **Objective 2 – Understanding Texts**

Students will interpret and respond to texts, applying their knowledge and understanding of language and culture.

#### **Objective 3 – Producing Texts**

Students will create and present texts in Italian for specific audiences, purposes and contexts, incorporating their linguistic and intercultural knowledge, understanding and skills.

## **6 Course Structure**

### **The Preliminary Course (120 indicative hours)**

The Preliminary Course has outcomes as its organisational focus. Topics provide contexts in which students develop their communication skills in Italian and their knowledge and understanding of language and culture.

### **The HSC Course (120 indicative hours)**

In the HSC course students will extend and refine their communication skills in Italian in contexts defined by topics, and will gain a deeper knowledge and understanding of language and culture.

## 7 Objectives and Outcomes

## 7.2 Key Competencies

Italian Stage 6 provides a powerful context within which to develop general competencies considered essential for the acquisition of effective, higher order thinking skills that are necessary for further education, work and everyday life.

Key competencies are embedded in the *Italian Beginners Stage 6 Syllabus* to enhance student learning. The key competencies of **communicating ideas and information** and **collecting, analysing and organising information** reflect core skills in language learning and are explicit in the objectives and outcomes of the syllabus. The other key competencies are developed through the methodologies of the syllabus and through classroom pedagogy. Students interact with one another, and through this interaction the key competencies of **planning and organising activities** and **working with others and in teams** are developed. In interacting with others via information and communication technologies, the student will develop the key competency of **using technology**. The skills associated with the interpretation of texts, such as the ability to comprehend meaning from context and using a dictionary, contribute towards the student's development of the key competency of **solving problems**.

## 8.2 Topics

The prescribed topics should be studied from two interdependent perspectives:

- the personal world
- the Italian-speaking communities.

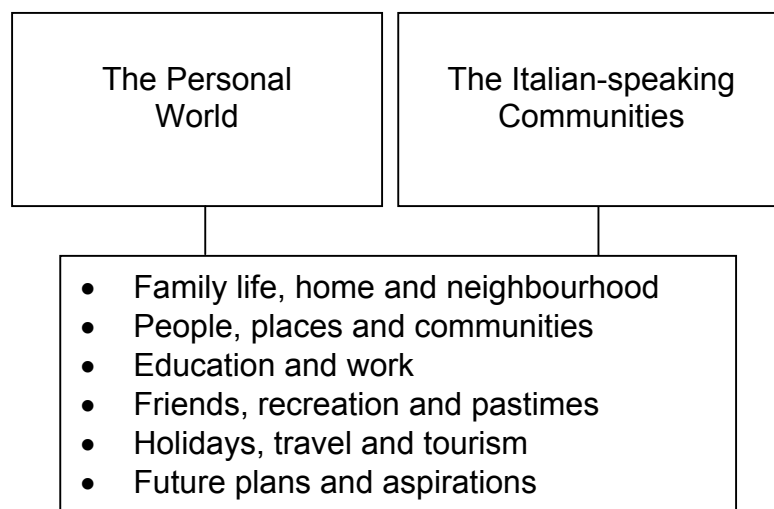

The two perspectives will enable students to develop knowledge and understanding of and skills in the Italian language, linked to cultural values, attitudes and practices.

The perspective, *the personal world*, will enable students to use Italian to express and share ideas about experiences and activities relating to daily life and transactions in their own world.

The perspective, *the Italian-speaking communities*, will enable students to inquire about and to express ideas in order to undertake activities and transactions appropriately in one or more communities where Italian is spoken.

The prescribed topics provide an organisational focus so that tasks can be presented as a series of related learning experiences in cohesive contexts.

### Topics

The topics are sufficiently broad to allow flexibility in school programs, but specific enough to be of practical assistance to students and teachers. The length of time devoted to each topic will vary according to the needs and interests of students and the availability of resources.

### 8.3 Texts

Texts for receptive use will not be prescribed. Students are encouraged to read, view and listen to a wide range of texts, including authentic texts. They may be expected to produce the following written texts in the external examination. The language to be used is the modern standard version of Italian.

article (eg for a school magazine)	message
diary/journal entry	note
email	postcard
informal letter	script of a talk (to an audience)

### 8.4 Tasks

This syllabus recognises the importance of tasks as an organising principle in structuring a program that allows the student to work towards meeting the objectives and learning outcomes.

Tasks, broadly defined as opportunities for the purposeful use of language, must be selected and designed so that students can develop and demonstrate knowledge, skills and understanding at increasingly complex levels.

Tasks can be described as having five elements:

- a purpose (a reason for undertaking the task that goes beyond the practice of the language for its own sake)
- a context (this may be real, simulated or imaginary, and include aspects such as where, when and who is involved)
- a process (thinking, problem-solving, creating)
- a product (a result that can be described in terms of achievement of the purpose of the task and of the student's overall cognitive development)
- an audience (the person/people at whom or to whom the task is targeted or directed).

### 8.5 Vocabulary

While there is no prescribed vocabulary list, it is expected that students will be familiar with a range of vocabulary relevant to the topics prescribed in the syllabus.

### 8.6 Dictionaries

Students should be encouraged to use dictionaries to enhance learning. It is expected that teachers will assist students to develop the necessary skills and confidence to use dictionaries effectively. Suitable editions will be included in the List of Resources on the Board of Studies website. Further information will also be provided in the External Examinations section of the syllabus. Students may use monolingual and/or bilingual print dictionaries in external examinations.

## 8.7 Grammar

Throughout the Italian Beginners course, students will learn about grammatical structures in context as they complement the content and organisation of individual programs.

The grammatical structures that will be defined are those that students will be expected to recognise and use by the end of the HSC course. They should be read in conjunction with the content of the syllabus. Grammar should be used to support the process of language acquisition and to facilitate communication, rather than being taught in isolation.

Students will be expected to **recognise** and **use** the following grammatical structures:

## 9 Assessment and Reporting

### 9.1 Requirements and Advice

The information in this section of the syllabus relates to the Board of Studies' requirements for assessing and reporting achievement in the Preliminary and HSC courses for the Higher School Certificate.

*Assessment* is the process of gathering information and making judgements about student achievement for a variety of purposes.

In the Preliminary and HSC courses those purposes include:

- assisting student learning
- evaluating and improving teaching and learning programs
- providing evidence of satisfactory achievement and completion in the Preliminary course
- providing the Higher School Certificate results.

*Reporting* refers to the Higher School Certificate documents that are used by the Board to report to students both the internal and external measures of achievement.

Higher School Certificate results comprise:

- an assessment mark derived from the mark submitted by the school and produced in accordance with the Board's requirements for the internal assessment program
- an examination mark derived from the HSC external examinations
- an HSC mark, which is the average of the assessment mark and the examination mark
- a performance band, determined by the HSC mark.

Results will be reported using a course report containing a performance scale with bands describing standards of achievement in the course.

The use of both internal assessment and external examination of student achievement allows measurements and observations to be made at several points and in different ways throughout the HSC Italian Beginners course. Taken together, the external examination and internal assessment marks provide a valid and reliable assessment of the achievement of the knowledge, understanding and skills described for each course.

The Board of Studies uses a standards-referenced approach to assessing and reporting student achievement in the Higher School Certificate.

The standards in the HSC are:

- the knowledge, skills and understanding expected to be learnt by students – the *syllabus standards*
- the levels of achievement of the knowledge, skills and understanding – the *performance standards*.

Both *syllabus standards* and *performance standards* are based on the aims, objectives, outcomes and content of a course. Together they specify what is to be learnt and how well it is to be achieved.

Teacher understanding of standards comes from the set of aims, objectives, outcomes and content in each syllabus together with:

- the performance descriptions that summarise the different levels of performance of the course outcomes
- HSC examination papers and marking guidelines
- samples of students' achievement, collected in the Standards Packages.

## **9.2 Internal Assessment**

The internal assessment mark submitted by the school will provide a summation of each student's achievements measured at points throughout the course. The marks for each course group at a school should reflect the rank order of students and relative differences between students' achievements.

Internal assessment provides a measure of a student's achievement based on a wider range of syllabus content and outcomes than may be covered by the external examination alone. The assessment components and weightings to be applied to internal assessment are identified on pages 27-28. They ensure a common focus for internal assessment in the course across schools, while allowing for flexibility in the design of tasks. A variety of tasks should be used to give students the opportunity to demonstrate outcomes in different ways and to improve the validity and reliability of the assessment.

## **9.3 External Assessment**

In Italian Beginners Stage 6, the external examination consists of an oral examination and a written examination. The specifications for the HSC examination in Italian Beginners are on pages 29-30.

The external examination provides a measure of student achievement in a range of syllabus outcomes that can be reliably measured in an examination setting.

The external examination and its marking and reporting will relate to syllabus standards by:

- providing clear links to syllabus outcomes
- enabling students to demonstrate the levels of achievement outlined in the course performance scale
- applying marking guidelines based on established criteria.

## **9.4 Board Requirements for the Internal Assessment Mark in Board Developed Courses**

The Board requires schools to submit an assessment mark for each candidate in the HSC Italian Beginners course. The Board requires that the assessment tasks used to determine the internal assessment mark must comply with the components and weightings specified in the table on page 28.

The collection of information for the HSC internal assessment mark must not begin prior to the completion of the Preliminary course.

Schools are required to develop an internal assessment program that:

- specifies the various assessment tasks and the weightings allocated to each task
- provides a schedule of the tasks designed for the whole course.

The standards-referenced approach to assessment for the HSC involves schools ensuring that in the design and marking of tasks:

- assessment tasks are designed to focus on outcomes
- the types of assessment tasks are appropriate for the outcomes being assessed
- students are given the opportunity to demonstrate their level of achievement of the outcomes in a range of different task types
- tasks reflect the weightings and components specified in the relevant syllabus
- students know the assessment criteria before they begin a task
- marking guidelines for each task are linked to the standards by including the wording of syllabus outcomes and relevant performance descriptions
- marks earned on individual tasks are expressed on a scale sufficiently wide to reflect adequately the relative differences in student performances.

In feedback and reporting:

- students receive meaningful feedback about what they are able to do and what they need to do in order to improve their level of performance
- the ranking and relative differences between students result from different levels of achievement of the specified standards
- marks submitted to the Board for each course are on a scale sufficiently wide to reflect adequately the relative differences in student performances.

Note that:

- measures of objectives and outcomes that address values and attitudes should not be included in school-based assessments of students' achievements. As these objectives are important elements of any course, schools may decide to report on them separately to students and parents, perhaps using some form of descriptive statements
- measures that reflect student conduct should not be included.

## 9.5 Assessment Components and Weightings

### Preliminary Course

The suggested components and weightings for the Preliminary course are set out below. When developing a schedule of assessment tasks, there should be a balance between the assessment of knowledge and understanding outcomes, skills outcomes and course content.

#### Preliminary Course

Component	Weighting	Suggested tasks
Listening <i>Objective 1: Interacting</i> <i>Objective 2: Understanding Texts</i>	35	interviews, role-plays listen and respond to advertisements, announcements, messages, conversations, interviews, news items
Reading <i>Objective 1: Interacting</i> <i>Objective 2: Understanding Texts</i>	35	interact via messages, notes, emails read and respond to advertisements, extracts from newspapers, magazines, reports, surveys, etc
Speaking <i>Objective 1: Interacting</i> <i>Objective 3: Producing Texts</i>	15	oral presentations interviews, role-plays
Writing <i>Objective 1: Interacting</i> <i>Objective 3: Producing Texts</i>	15	interact via messages, notes, emails produce different kinds of writing, eg article, diary entry, informal letter, postcard, script of a talk
<b>Total:</b>	<b>100</b>	

## HSC Course

The mandatory components and weightings for the HSC course are set out below. The internal HSC assessment mark for Italian Beginners is to be based on the HSC course only.

Teachers can use their discretion in determining the manner in which they allocate tasks within course content. While the allocation of weightings to the various tasks set for the HSC course is left to individual schools, the percentages allocated to each syllabus component must be maintained.

It is suggested that three to five tasks are sufficient to assess the Italian Beginners HSC Course. The range of tasks comprising the school-based assessment schedule should be varied and address the range of outcomes. One task may be used to assess several components. Class tests, term tests and trial examinations should not exceed 50% of the assessment program.

### HSC Course

Component	Weighting	Suggested tasks
Listening <i>Objective 1:Interacting</i> <i>Objective 2:Understanding Texts</i>	30	interviews, role-plays listen and respond to advertisements, announcements, messages, conversations, interviews, news items

## **9.9 Reporting Student Performance against Standards**

Student performance in an HSC course is reported against standards that have been described for that course. The course report includes a performance scale for the course describing levels (bands) of achievement, an HSC mark located on the performance scale, the examination mark and the internal assessment mark. It also shows, graphically, the statewide distribution of examination marks of all students in the course.

With the exception of Band 1, each band on the performance scale includes descriptions that summarise typical student achievement in that course for that particular band.

The distribution of marks is determined by students' performances mapped against the standards. Marks are not scaled to a predetermined distribution.

## 10 Post-school Opportunities

The study of Italian Beginners Stage 6 provides students with knowledge, understanding and skills that form a valuable foundation for a range of courses at university and other tertiary institutions.

In addition, the study of Italian Beginners Stage 6 assists students to prepare for employment and full and active participation as citizens. In particular, there are opportunities for students to gain recognition in vocational education and training. Teachers and students should be aware of these opportunities.

### Recognition of Student Achievement

Wherever appropriate, the skills and knowledge acquired by students in their study of HSC courses should be recognised by industry and training organisations. Recognition of student achievement means that students who have satisfactorily completed HSC courses will not be required to repeat their learning in courses at TAFE NSW or other Registered Training Organisations (RTOs).

Registered Training Organisations, such as TAFE NSW, provide industry training and issue qualifications within the Australian Qualifications Framework (AQF).

The degree of recognition available to students in each subject is based on the similarity of outcomes between HSC courses and industry training packages endorsed within the AQF. Training packages are documents that link an industry's competency standards to AQF qualifications. More information about industry training packages can be found on the National Training Information Service (NTIS) website ([www.ntis.gov.au](http://www.ntis.gov.au)).

### Recognition by TAFE NSW

TAFE NSW conducts courses in a wide range of industry areas, as outlined each year in the *TAFE NSW Handbook*. Under current arrangements, the recognition available to students of Italian in relevant courses conducted by TAFE is described in the *HSC/TAFE Credit Transfer Guide*. This guide is produced by the Board of Studies and TAFE NSW. Teachers should refer to this guide and be aware of the recognition available to their students through the study of Italian Beginners Stage 6. This information can be found on the TAFE NSW website ([www.det.nsw.edu.au/hsctafe](http://www.det.nsw.edu.au/hsctafe)).

### Recognition by other Registered Training Organisations

Students may also negotiate recognition into a training package qualification with another Registered Training Organisation. Each student will need to provide the RTO with evidence of satisfactory achievement in Italian Beginners Stage 6 so that the degree of recognition available can be determined.
